> ?? Potential render-blocking script(s) found. Consider adding `defer` or `async` to these tags.

> JS: <https://cdn.tailwindcss.com>...

> JS: [/penta5w/tracker.js](#)...

--- Structured Data (Schema) Validation ---

=====

Action Required! Found 3 critical metadata item(s) to add/fix.

--- 1. Canonical Link ---

Reason: Tells Google the definitive URL, preventing duplicate content dilution. CRITICAL for SEO.

Action: Insert the following code into your `<head>` section:

```
```html
```

```
<link rel="canonical" href="https://www.yourdomain.com/this-page-path">
```

```
```
```

(Remember to replace placeholder URLs/text!)

--- 2. Open Graph (og:) Tags ---

Reason: Controls the rich snippet when shared on Facebook, LinkedIn, etc.

Action: Insert the following code into your `<head>` section:

```
```html
```

```
<meta property="og:title" content="Analytics Integration Demo">
```

```
<meta property="og:description" content="? MISSING">
```

```
<meta property="og:type" content="article">
```

```
<meta property="og:url" content="https://www.yourdomain.com/this-page-path">
```

```
<meta property="og:image" content="https://www.yourdomain.com/social-image-1200x630.jpg">
...

```

(Remember to replace placeholder URLs/text!)

### --- 3. Twitter Card Tags (twitter:) ---

Reason: Controls the rich media display for your link when shared on X (formerly Twitter).

Action: Insert the following code into your ``<head>`` section:

```
```html
<meta name="twitter:card" content="summary_large_image">
<meta name="twitter:site" content="@yourhandle"> (Replace with your X handle)
<meta name="twitter:title" content="Analytics Integration Demo">
<meta name="twitter:description" content="? MISSING">
<meta name="twitter:image" content="https://www.yourdomain.com/social-image-1200x630.jpg">
...

```

(Remember to replace placeholder URLs/text!)
